Brand Guidelines

As a brand, we always strive to be clear, transparent, and understandable.

These guidelines provide standards for putting our brand to work across all applications. They will help maintain the brand integrity by providing direction for when, where, and how to use Charles River Analytics assets.

By following these practices correctly and consistently, we continue to protect and strengthen the Charles River Analytics presentation.

If you need further direction or can't find what you're looking for in this document, please contact our marketing department for assistance.

Company

Charles River Analytics conducts leading-edge AI, robotics, and human-machine interface R&D and leverages that R&D to create custom solutions for your organization.

At Charles River Analytics, we come to work every day because we want to develop technology for the hardest human-machine teaming problems that impact critical operations and decision-making. In 1983, we began focusing on research that leads to results, initially working for the US government. We became an employee-owned company in 2012, setting the stage for the next generation of innovation, service, and growth. Today, we have nearly 200 employees who work on R&D and commercial programs that make a difference for a “who’s who” of government and industry.

We have a stellar track record developing successful solutions for Government and commercial clients across a diverse collection of markets—defense, intelligence, medical technology, training, transportation, space, and cyber security. Our success is based on our expertise with advanced algorithms, machine learning, autonomous systems, advanced human-system interfaces, and agile software and hardware engineering. Focused research can make a positive difference, and that is our goal on each project we undertake. Our customer-centric focus guides us towards problems that matter, while our passion for science and engineering drives us to find impactful, actionable solutions.

Our voice is

- **Direct and Clear:** Our work is well researched, we take pride in presenting a strong analysis of our process and ideas in the clearest possible way.
- **Curious:** We are deeply interested in our work and tackle projects from wide variety of approaches.
- **Inspiring:** We invite our audience to explore with us, take risks, and come back transformed.

We adapt our tone to meet the needs of a particular audience, channel, or circumstance. In communication we strive to be relatable and friendly, while maintaining clarity and accuracy.

Brand Hierarchy

Our corporate brand encompasses multiple family brands and spin-off companies. We adhere to an umbrella hierarchy for the development of family brands and the establishment of product awareness. When crafting marketing materials, we limit the display of brand relationships to a maximum of three levels. Occasionally, we might feature only the family brand alongside a single product.

- **Corporate Brand**
Primary brand/name/logo, company name
- **Family Brand**
“Umbrella Brand”, range of products
- **Individual Brand**
Single product
- **Modifier**
Lowest part of the brand, models, versions, etc.

Hierarchy examples

Here are a few examples of brand hierarchies at Charles River.

KWYN

(a family of brands) The CRA branding is included on high-level marketing materials, but is shown smaller.

Veero

(a subsidiary brand and spin-off company) The CRA branding is not included on most marketing materials.

Logo Usage

Logo with icon usage

Our primary logo is a horizontal lockup that includes our icon. Please use this orientation whenever possible. For situations that require a vertical orientation, use the square logo. It can also be formatted as a circle.

The icon has layered messaging representing the internal development process followed during project work. It's main hexagonal shape a network of dotted lines moving within to form the letter C. The network lines appear to break off at the end of the C curve, which conveys the many vessels and products our company launches.

Primary horizontal logo

Secondary horizontal logo

Square logo

Social icon

Text logo usage

Our plain text logo is a secondary option. This element should only be used when our primary logo is not a good fit. We deploy this simpler version of the logo when there are very specific or small sizing requirements.

To be impactful, our logo needs clear space that no other element (explicit or implicit) can cross, no matter what the application. We use the following space guide as a minimum measure to give our logo the room it needs.

Secondary text logo

Branded family logos

Charles River is the parent company of several brand families. To indicate the relationship between these brands, we use specific subsidiary labeled logos.

KWYN functions as a distinct brand entity within the overarching structure of Charles River Analytics' house of brands. When showcasing KWYN products, we strategically position the KWYN trademark tag above the existing logo, serving as a visual testament to the interconnected brand relationship. This approach not only reinforces brand recognition but also ensures clarity for our consumers in identifying the origin and quality of KWYN offerings.

In KWYN's marketing materials, the primary CRA branding is featured at the top of high-level marketing content, to maintain visibility. This approach ensures that the relationship between KWYN and Charles River Analytics is effectively conveyed while allowing KWYN's unique identity to shine.

There are some cases where the CRA branding is left off entirely, but that is only when absolutely necessary.

Charles River and branded family pairing

Branded family logos presented without Charles River branding

Subsidiary logos

Charles River is also the parent company of subsidiary brands. To indicate the relationship between these brands, we use specific subsidiary labeled logos.

For example, Veero is a subsidiary of Charles River, in which Charles River holds the majority ownership. Therefore, including Veero's logo in marketing materials is not deceptive or misleading. However, it's important not to refer to Veero as a "wholly-owned subsidiary" or manipulate the text to make it appear as if Veero is the parent company.

When using co-branded logos, it's necessary to exercise caution and ensure they are associated with the correct products. Our main concern is to not be deceptive or misleading to consumers. When deciding whether to label something as Veero, Charles River, or both, it's crucial to make it clear to consumers where the product originates from.

White subsidiary logo example

Favicon usage

Our favicon design is slightly different from the logo icon; this is because the dotted lines in the icon do not show up properly at a 16x16 pixel size. Only use this favicon style for extremely small scales.

16x16 pixels

Color Palette

Primary Color Palette

Our corporate color system allows for the dynamic expression of a forward looking Charles River Analytics.

The palette is bright, bold, and succinct, to help us feel fresh and modern. By using our color palette with intention, we keep things light, balance negative space, and use additional color as an accent.

* When using these colors, always type in these color codes. Do not eyedrop colors from this document! Colors have been calibrated for web and print and may not be consistent with the color swatch here.

Website Menu Blue

This vibrant, non-printable blue accent is designed specifically for digital use in our website menu. Selected to create an energetic first impression, it should be used sparingly and only in digital materials, as it is not suitable for print. For print applications, the substitute for this accent color is our logo color.

Secondary Color Palette

The accent palette is comprised of bright and simple hues derived from basic primary colors. Keep in mind that it should be used sparingly and in small quantities in relation to the primary palette.

Be sure to provide enough contrast when using text on these colors. White text on light backgrounds is hard to see.

Gray Values

Three main gray values, and black, are used in the secondary palette. However, if you need to use more (or a different shade) choose from the PMS Cool Gray family, of which there are 10 values, or a transparency percentage of one of these values.

Typography

Primary Typeface

Proxima Nova

The primary display typeface, Proxima Nova, uses similar foundation letter forms as our Charles River Analytics logo, giving our communications a striking yet friendly feel.

Because of its size, it's best to save this typeface for headlines, subheads, pull-quotes, and other large-type situations. Proxima Nova is also used for all public-facing print and digital executions.

Photography

Photography Style

Charles River Analytics imagery is never overly bright, is composed candidly, and is photographed from an observer's point-of-view. There's an authenticity as the photographs reflects the nuances of life.

Photography Do's & Don'ts

What's right with this image?

- Scenario looks real
- They genuinely seem to be conversing
- It's a moment captured in time

What's wrong with this image?

- Scenario looks fake
- Overly staged
- Flat lighting

What's right with this image?

- Sense of being part of the motion
- Format is unexpected for this type of image
- Colors are vibrant and dynamic

What's wrong with this image?

- Strange gradient color saturation fading through image
- Helicopter angle is awkward making it difficult to understand the context and setting

Photography Do's & Don'ts

What's right with this image?

- Scenario looks real
- They genuinely appear to be working
- Lighting is dynamic and appropriate for the context

What's wrong with this image?

- Scenario has no context
- Image is clearly stock
- Does not reference real interface design; looks silly

What's right with this image?

- Placement of subject is involved and interesting
- Candid framing
- Sense of being part of the shot

What's wrong with this image?

- Scenario has no context
- Image is clearly stock
- Does not reference real interface design

Patterning and Motifs

The Grid

The Grid is an abstraction of engineering graph paper. This pattern can add interest and texture to large areas, as well as add a layer of motion and depth to an execution.

Polygon building blocks

The polygon building blocks pattern is a representation of how concepts are developed. Each polygon can be seen as a basic unit from which our projects are built up.

In 3D computer graphics, polygonal modeling is an approach for modeling objects by representing or approximating their surfaces using polygon meshes. Polygonal modeling is well suited to scanline rendering and is therefore the method of choice for real-time computer graphics.

Strategic Usage

- Overuse of this element is not recommended.
- This background element should only be used strategically, in instances where including a patterning element appears to be a requirement for visual balance.
- Photographic backgrounds with gradient color fields should always be considered first.

Iconography

Iconography

Our icon design is focused on a flat design and minimalistic approach. Our icons are clean and have crisp, often sharp edges with a flat two-dimensional graphic layout.

*Do not use drop shadows with our icons.
